hello baby!

THE ORIGINAL VIDEO CHILDBIRTH CURRICULUM!

Using the stories of real people that expectant parents can really relate to, **Hello Baby!** can be shown in the way that best suits your class needs.

Part One: Three Birth Stories introduces three couples of various ages and backgrounds. While their experiences represent relatively uncomplicated births, each family helps to demonstrate the powerful message that no two labors are alike.

Part Two: Medical Options and Practices provides a comprehensive survey of common medical procedures and gives parents the information they need to make informed decisions during the birth process.

Part Three: A Cesarean Birth provides a look at the procedures, medical personnel and surgical setting typically involved in a cesarean birth.

The classroom version of this program is available for free 30-day preview. Simply select the preview option when placing your web order. Your credit card will not be charged unless you keep the program beyond the preview period. Purchase orders may be faxed to 617-864-7862 and must include all product information, including price, with the words **"for 30-day preview"** clearly indicated. Preview orders are shipped free-of-charge by UPS ground.

Publishers Note

For our most current childbirth education curriculum please see **Hello Family** and **Works of Wonder**.

"...In an authoritative, sensitive, and friendly voice, this compact teaching film about birth stresses the values of preparation, autonomy, partnership, acceptance and finally, awe."

- Adrienne Lieberman, ACCE, author *Easing Labor Pain and Giving Birth*

About Vida Health Communications

Since 1985, Vida Health Communications has been working to improve the health of women, children and families through the production and distribution of evidence-based educational media for clinical, patient and lay audiences. Working in partnership with federal health agencies, researchers and leading medical professional groups, Vida translates complex research into practical, media-based training using DVD, CD-ROM, Internet and linear video technologies. For more information please visit our website.
